

ELSAYED ABDEL MONEM

MOBILE TEAM LEAD · FLUTTER & NATIVE MOBILE

Mansoura, Egypt · +20 106 023 9912 · elsaed3766@gmail.com
github.com/elsayed235 · linkedin.com/in/elsayed-abd-elmonem-arab

OBJECTIVE

Mobile team lead with 4+ years delivering scalable, high-performance iOS and Android applications — including a real-estate platform with 100K+ downloads. Comfortable across the full delivery path: Flutter and native Swift/Kotlin on the front end, Laravel and Firebase Functions on the back end. Uses AI tooling and custom tool-calling agents to compress delivery cycles without trading away code quality. Mentors junior developers and works closely with design and product.

EXPERIENCE

Code Craft — Mobile Team Lead (Flutter)

01/2022 - current

- Lead the mobile team at a delivery-focused software house, taking client-defined scopes from planning through release.
- Own project planning, code reviews, and task distribution across the mobile team.
- Design and enforce standards for architecture, state management, and code quality across projects.
- Guide implementation of critical modules — payments, maps, push notifications, and in-app services.
- Mentor junior developers and run knowledge-sharing sessions to shorten onboarding time.
- Coordinate with product managers and client stakeholders to align mobile delivery with business goals.

Treasure Company - Dubai (Remote, Part-time)

01/2022 - 07/2025

- Implement **state management solutions** using **Bloc** and other best practices to ensure smooth data flow and UI responsiveness.
- Utilize **CI/CD pipelines** and **automated testing** (unit, widget, integration) to streamline the development process and ensure the highest quality of code.
- Optimize application performance by reducing app size, improving load times, and debugging to enhance the overall user experience.
- Participate in **Agile/Scrum** processes, contributing to sprint planning, sprint reviews, and retrospective meetings to ensure the timely delivery of milestones and features.

Awamer El Shabaka – Saudi Arabia

07/2020 - 01/2022

- Build multiple apps for Saudi Arabian customers
- Stay updated with the latest **Flutter** releases, libraries, and best practices, continuously evolving the development process to incorporate new tools and technologies.
- Build and maintain detailed documentation for internal and external stakeholders, ensuring knowledge transfer and consistency across teams.

PROJECTS

- **Sakan — Real Estate Platform (100K+ downloads)** — Property search with advanced filtering, saved/compare lists, price-change notifications, map integration, and direct buyer-to-seller contact. Built to keep large listing datasets fast and smooth on both platforms. [Android](#) · [iOS](#)
- **Zaheb — Ride-Hailing & Delivery (driver + customer apps)** — Dual driver and customer flows with real-time location tracking, driver assignment, order management, and live status updates. Driver: [Android](#) · [iOS](#) Customer: [Android](#) · [iOS](#)
- **City Guide — City-Wide Services Super-App** — Multi-vendor marketplace connecting an entire city: businesses showcase products and services while customers order and communicate with vendors directly. [Android](#) · [iOS](#)
- **Weideliver — Delivery & Logistics Platform (store + driver apps)** — Two-sided platform:

merchants manage orders and dispatch from the store app, while drivers go online, accept jobs, and track weekly earnings. Supports both a business's own fleet and an on-demand driver pool.
Store: [Android](#) Driver: [Android](#)

- **Wafeyyat — After-Death Services Platform** — Guides families through obituary creation, burial and funeral arrangements, prayers, and required documentation, with services filtered by religious practice. [Android](#)
- **Reserva — E-Commerce** — Store management, product catalogs, order flows, payments and vouchers; checkout logic, discounts and wallets, with robust validation and error handling.

SKILLS AND ABILITIES

Technical Skills

- **Flutter & Dart** — 4+ years of production cross-platform apps; custom widgets, animations, and responsive pixel-perfect UI.
- **Native Mobile** — Swift (iOS) and Kotlin/Java (Android) for platform-specific features and native module integration.
- **Architecture & State** — Clean Architecture and MVVM using BLoC, Provider, and GetX across large modular codebases.
- **Backend** — Ships own endpoints in Laravel and Firebase Functions; integrates REST, GraphQL, and WebSockets.
- **AI-Assisted Engineering** — Daily use of Claude, Cursor, and Copilot for feature delivery, refactoring, and code review.
- **AI Agents & Automation** — Builds tool-calling agents and MCP integrations to automate delivery and internal workflows.
- **Quality & Delivery** — CI/CD (GitHub Actions, Bitrise), unit/widget/integration testing, performance profiling, Git, Agile/Scrum.
Stack: Flutter · Dart · Swift · Kotlin · BLoC · Provider · GetX · Clean Architecture · REST · GraphQL · WebSockets · Laravel · Firebase · Firebase Functions · AWS · MCP · Claude · Cursor · Copilot · GitHub Actions · Bitrise · Git · Agile/Scrum

EDUCATION

Bachelor's Degree — Computers & Information Systems · Mansoura University	2020 – 2024
